Green perfume refers to fragrances that capture the essence of nature's freshness.

These scents typically feature:

Crisp top notes reminiscent of crushed leaves and morning dew

- Herbal middle notes like basil, mint, or thyme
- Earthy base notes including vetiver and moss
- Unlike floral or sweet perfumes, green perfume offers a clean, almost "outdoorsy" aroma that many describe as "walking through a lush garden after rainfall."

## The History of Green Perfumes

The concept of green perfume emerged in the early 20th century when perfumers began moving beyond traditional floral bouquets. Key milestones include:

1917: Coty's "Chypre" introduced mossy green accords

- 1947: Vent Vert by Balmain pioneered the modern green fragrance
- 1990s: Calvin Klein's "Escape" brought green notes to mainstream audiences
- Today, green perfume remains popular among those seeking fresh, unisex scents that work well in professional and casual settings.
